subjects

Acetazolamide: see Drugs
Achilles tendinitis: see Tendinitis
Achilles tendon: see Tendons
Acute mountain sickness: see Altitude, Mountain climbing
Adolescents: see also Children in sports
competitive stages in development, Jan, p 125
counseling recommended to minimize dangers of heat stress and weight loss, Jan, p 127
drop-out rate from sports peaks at age 13, Apr, p 39
drug use penalties changed in Minnesota high schools, Jun, p 26
epiphyseal fractures, diagnosis and treatment, Nov, p 63
female cross-country runners in high school: body composition, Nov, p 103; Dec p 19
injury form required for Seattle athletes, Nov, p 36
low back pain, diagnosis and treatment, Oct, p 77
mouth guards in junior football players, Sep, p 41
preparticipation exams given by Michigan sports medicine clinic, Sep, p 113
redshirting football players makes a mockery of interscholastic sports, May, p 49
scoliosis treatment with electrodes allows activity, Apr, p 39
swimmer's shoulder pain reduced by stretching, Oct, p 43
Aerobic dance: see Dance
Aerobic exercise: see Exercise
Aging: see also Older athletes
do as well as you feel, Nov, p 45
masters competitors age little in ten years, Oct, p 27
Air pollution
adverse effects on performance, Mar, p 126
Alcohol: see Drugs
Allergy: see also Asthma
to chemicals in athletic shoes, Oct, p 56
Altitude: see also Mountain climbing
acetazolamide improved sleep and reduced Cheyne-Stokes breathing in climbers, Jun, p 79
sleep disturbances at high altitude, Jun, p 79
Amenorrhea: see Female athletes, Menstruation
American Academy of Pediatrics
history of Trampolines I and Trampolines II policy statements, Dec, p 118
American Academy of Pediatrics Policy Statements
preadolescents should avoid weight lifting, Jul, p 141
risks in long-distance running for children, Aug, p 82
trampolines II, Dec, p 63
American Alliance for Health, Physical Education, Recreation and Dance
PCPFS questions new fitness test, Feb, p 29
sponsors fitness forums, Aug, p 196
American College of Sports Medicine
approves weight-loss guidelines, Dec, p 27
certification standards for fitness instructors announced, Aug, p 44
rapid growth causes organizational change, May, p 123
sponsors fitness forums, Aug, p 196
who speaks for sports medicine?, Sep, p 174
American Medical Association
boxing safety recommendations, Oct, p 27

Amphetamines: see Drugs
Anemia: see Blood diseases
Angina: see Heart disease
Angioedema
in a high school wrestler, Feb, p 17
Ankle injuries
articular fractures of the talar dome: mechanisms of injury, diagnosis, and treatment, Oct, p 113
controlling edema with pads, Aug, p 195
sprains, mechanism of injury important in diagnosis, Apr, p 39
spur removal relieves anterior impingement syndrome, Jan, p 124
Anterior cruciate ligament: see Knee, Knee injuries
Anthropometrics: see Body composition
Anti-inflammatory agents: see Drugs
Arthroscopy
arthroscopic surgery complications, Oct, p 41
arthroscopic views of the knee, Oct, p 195
arthroscopy and arthrotomy compared, Oct, p 41
arthroscopy improved diagnosis in acute knee ligament injuries, May, p 23
indications and contraindications, Oct, p 195
questions remain about use, Oct, p 57
standard protocol necessary, says physician, May, p 40
Arthrotomy: see Knee injuries
Asthma
exercise-induced, reduced by PEEP breathing, Jan, p 124
Athletes: see individual sport
Athletic care: see also individual sport, individual injury
coaches who took injury-recognition course reported more injuries, Oct, p 32
medical care at a professional golf tournament, Aug, p 63
medical care for athletes: are coaches getting the message?, Nov, p 159
medical care for 1981 Junior Olympics, Jun, p 120
NFL players seek more control over medical care, Jul, p 162
program trains teachers during summer months to be athletic trainers, Apr, p 85
for road races, Aug, p 151
road-race safety campaign by Noel Nequin, Feb, p 133
Athletic equipment: see Equipment
Athletic performance: see Performance
Australia
two sports medicine clinics, Jul, p 169

Back
pain, flexibility exercises, Oct, p 90
pain in young athletes, diagnosis and treatment, Oct, p 77
Back injuries
in golfers in the Tournament Players Association, Jul, p 64
Backpacking
preparing for summer backpacking, May, p 161
preparing for winter backpacking, Feb, p 141
Ballet: see Dance
Bannister, Roger
doubts about laboratory research, Jun, p 24
Baseball: see also Softball
physiological characteristics of major league players, May, p 51
strength training reduced body fat and improved muscle symmetry in professional players, Oct, p 125
Baseball injuries
hand-ball contact caused most injuries in recreational players, Jun, p 37
in major leagues, contract length correlated to injuries, Aug, p 44
pitcher's elbow, Oct, p 42
Basketball injuries
of professional players, Nov, p 81
Behnke, Albert R., Jr
sports medicine pioneer, Nov, p 169
Bicycle ergometers: see Ergometers
Bicycling: see also Cyclo-cross racing, Ergometers
changes in fitness after a four-week tour, May, p 78
interval training for cardiovascular fitness, Oct, p 156
saddle problems, prevention and correction, Oct, p 60
Biomechanics
gait cycle causes hallux valgus, Aug, p 103
of ski bindings, Feb, p 48
soccer team uses video analysis to prevent minor injuries, Mar, p 29
Blisters
friction blisters: prevention and treatment, Mar, p 84
Blood diseases
pseudoanemia detected in healthy marathon runners, May, p 21
Boating: see also Sailing
schooner cruises, Mar, p 147
Body composition: see also Physiological profiles
amenorrhea-body fat link poses controversial questions, May, p 142
body fat percent measured with x-rays, Aug, p 43
body fat slows down hockey players, Nov, p 91
body fat: understanding the enemy, Mar, p 159
changes in professional baseball players after strength training program, Oct, p 125
of female high school cross-country runners, Nov, p 103; Dec, p 19
Frisch defends body fat hypothesis, May, p 142
methodology of measurement in sports medicine, Dec, p 46
Siri formula misses fat, say researchers, Nov, p 35
skinfold caliper expense and accuracy discussed, Jul, p 18
Body fat: see Body composition
Bone
osteoporosis and exercise, Mar, p 72
physical training increased quantity of bone in swine, May, p 21
Bowerman, Jack
radiologist dies after heart attack at age 43, Mar, p 32
Boxing
head injuries few in US Military Academy study, Aug, p 43
safety recommendations of AMA panel, Oct, p 27
thumbless glove prompts complaints, modifications, May, p 39
tough-man fights banned in Minnesota, May, p 147
Brassieres: see Equipment
Bronchospasm: see Asthma
Bursitis: see also individual sport
Achilles tendon injuries and disabling conditions, Dec, p 96
rotator cuff impingement syndrome in sports, Dec, p 86

Canada
Canada Fitness Survey preliminary results, Sep, p 29
survey shows athletes wait too long to report injuries, Apr, p 127
Carbohydrate loading: see Nutrition
Carbohydrates: see Nutrition
Cardiopulmonary resuscitation
use questioned for severe hypothermia victims, Feb, p 27
Cardiovascular disease: see Heart disease
Cardiovascular system: see Heart
Casts
modified silicone rubber playing cast for hand and wrist injuries, Nov, p 168
Cheerleading
pyramids restricted at Omaha universities, Jul, p 15
Cheyne-Stokes breathing: see Altitude, Mountain climbing
Children in sports: see also Adolescents
activity guidelines for children with cardiovascular problems, Feb, p 78
children under 14 shouldn't run more than 10 km, says physician, Jun, p 26
cystic fibrosis patients improved ventilatory status after swim training, Oct, p 201
diagnosing typical sports injuries, Jan, p 126
epiphyseal fractures, diagnosis and treatment, Nov, p 63
Feelin' Good program teaches heart health to children, May, p 128
heart disease intervention program shows children can improve activity patterns, Sep, p 96
organized sports take the place of sandlot games, Aug, p 49
organized sports: training and overuse injuries, effects of psychological pressures, Aug, p 52
pediatric cardiology meets exercise physiology, Nov, p 147
Perthes disease, guidelines for returning children to sports activities, Jun, p 69

continued

risks in long-distance running, Aug, p 82
weight lifting, does it harm prepubescents?, Jul, p 141
weight training before puberty called unproductive and dangerous, Jan, p 126
China
sports medicine in China, Jun, p 177
Chondromalacia patellae: see Knee injuries
Claudication: see also Peripheral vascular disease
effects of diet and exercise on peripheral vascular disease, May, p 90
popliteal artery entrapment syndrome, May, p 104
Clinics and centers: see also Olympic Games
Atlanta sports medicine and physical therapy clinics, Oct, p 170
Garden City (Michigan) Sports Medicine Clinic gives preparticipation exams, Sep, p 113
Hospital for Special Surgery in New York City, Aug, p 179
hot line for sports medicine questions staffed by Indianapolis trainers and physicians, Jun, p 23
Karolinska Institute in Sweden, Aug, p 161
Lake Placid chosen new winter Olympic training site, Dec, p 25
Senate gym gets budget ax, Nov, p 33
sports medicine clinics growing, but lack evaluation system, Oct, p 165
sports medicine directory 1982, Sep, p 155
Sports Performance and Rehabilitation Institute in Illinois, Sep, p 137
sports vision center opens in Philadelphia, May, p 40
Vinland National Center gives workshop on cold injury for handicapped athletes, Jan, p 25
Wheaton Orthopedic Sports Medicine in Illinois, Sep, p 137
Clothing: see Equipment
Coaching
coaches who took injury recognition course reported more injuries, Oct, p 32
medical care for athletes: are coaches getting the message?, Nov, p 159
swim training, how coaches get results, Jun, p 161
training programs for volunteer coaches, Nov, p 183
Cold: see also Cryotherapy
clothing should complement heat conservation mechanisms, Feb, p 71
CPR questioned for hypothermia victims, Feb, p 27
exercising safely in winter, Jan, p 130
hypothermia and hyperthermia confused in diagnosing road racers, Aug, p 156
hypothermia in whitewater paddlers, Aug, p 118
thermal injury risks greater for handicapped athletes, Jan, p 25
winter backpacking preparations, Feb, p 141
Colds: see Respiratory tract
Commerce and sport
football fund proposed to end liability lawsuits, Jun, p 48, 197
hotel exercise facilities for travelers, Jan, p 115
selling life-style counseling to public schools, May, p 131
Concussion: see Head injuries
Conditioning: see Exercise, Flexibility, individual sport
Congress: see Government agencies
Coronary disease: see Heart disease
Coronary risk factors: see Heart disease
Cricket
fast pitches change the sport, Jun, p 186
Cross-country skiing: see Skiing
Cryotherapy
effects, methods, and risks, Nov, p 112
ICE for immediate care of injuries, Feb, p 137
medical care for athletes: are coaches getting the message?, p 159
Cyclo-cross racing
popularity increases, Jun, p 204
Cystic fibrosis
ventilatory status improved in children after swim training, Oct, p 201

Dance
aerobic dance during pregnancy, Jul, p 46
aerobic dance, guidelines for choosing a program, Sep, p 150
aerobic dance, researchers question cardiovascular training value, Sep, p 147
ballet dancers: exercise, body weight, and amenorrhea, Apr, p 92
conditioning may prevent injuries in dancers, Jul, p 18
heart rate response to ballet stage performance, Nov, p 120
injuries and ballet technique, Jul, p 100
medical problems in ballet, Mar, p 98
nutrition and anorexia are still problems of ballet dancers, Aug, p 190
nutritional problems and case reports, Mar, p 137
Dardik, Irving
Olympic sports medicine, new directors and goals, Jul, p 149
Deaf athletes: see Handicapped athletes
Death
Jack Bowerman, radiologist, dies after heart attack at age 43, Mar, p 32
fatal and nonfatal cardiovascular complications of recreational activities, Jun, p 89
football head/neck fatalities, Oct, p 135
javelin fatality in North Dakota prompts concern over impact areas, Jun, p 24
from mountaineering and rock climbing in Grand Teton National Park, Jun, p 52
Thomas B. Quigley dies, Nov, p 10
Dehydration: see Fluid replacement
Dental care: see also Equipment (mouth guards)
hypothesis for placebo effect of MORAs, Sep, p 132
MORA function confusing because of gaps in anatomical knowledge, Sep, p 133
MORAs cause no increases in strength or endurance after double-blind experiment, Feb, p 101
mouth appliances and concussions, Sep, p 136
mouth guard construction, Sep, p 136
relationship of intraoral protective devices to injuries and performance, Sep, p 131
status of sports dentistry, Sep, p 19
team dentists, demand for on community and high school teams, Sep, p 132
Dentistry: see Dental care
Dermatitis: see Skin diseases
Diabetes
insulin and diet more important than exercising in regulation, Apr, p 133
Diet: see Nutrition
Diving
no-panic syndromes in underwater diving, Aug, p 88
scuba regulators as resuscitators for in-water rescue breathing, Mar, p 116
DMSO: see Drugs
Dominguez, Richard
stance on static stretching is small part of sports medicine involvement, Sep, p 137
Drowning/near drowning
scuba regulators as resuscitators for in-water rescue breathing, Mar, p 116
Drugs: see also Ergogenics, Steroids
abuse in sports: denial fuels the problem, Apr, p 114
acetazolamide helped mountain climbers sleep better, Jun, p 79
caffeine banned by IOC, Jul, p 15
DMSO ineffective in tennis elbow and rotator cuff tendinitis, Feb, p 8
drug-free athletes have the real advantage, Apr, p 50
employee assistance programs in professional sports, Apr, p 114
penalties for drug use changed in Minnesota high schools, Jun, p 26
testosterone banned by IOC, Jul, p 15

Ecchymosis: see Foot injuries
Elbow injuries: see also individual sport
pitcher's elbow, Oct, p 42
Electrical stimulation
effects similar to muscular exercise, Feb, p 8
Electrocardiograms: see also Heart, Heart disease
ECGs showing mitral valve prolapse, Jul, p 49
monitoring cardiac patients: how much is enough?, Jun, p 146
telemetry and stress tests used on Michigan hockey players, May, p 39
Employee fitness: see Industry fitness
Endorphins
blood levels increase after exercise but little is known about their function, Feb, p 111
Epiphysis
fracture of in sports, Nov, p 63
Equipment
bicycle ergometers and treadmills in exercise testing and rehabilitation, Aug, p 75

bicycle saddle problems, prevention and correction, Oct, p 60
boxing glove without thumb prompts complaints, modifications, May, p 39
bra controversy: are sports bras a necessity?, Nov, p 75
clothing to prevent bicycle saddle problems, Oct, p 60
clothing for winter exercise, Jan, p 130
clothing should complement heat conservation mechanisms, Feb, p 71
extremity elevation unit, Jul, p 176
eye guard performance evaluated, Mar, p 62
eye guards must have polycarbonate lenses to prevent injuries in racket sports, Mar, p 47
football helmet makers seek new ways to improve helmets, Jun, p 198
hockey players tested with telemetry, stress tests, May, p 39
horseback riders urged to use headgear, Feb, p 29
mouth appliances, injuries, and performance, Sep, p 131
mouth appliances: no increases in strength or endurance after double-blind experiment, Feb, p 101
mouth guard construction, Sep, p 136
mouth guards in junior football players, use and maintenance, Sep, p 41
mouth guards required in Big Ten field hockey, Sep, p 28
mouth guards tested and compared, Sep, p 41
scuba regulators as resuscitators for in-water rescue breathing, Mar, p 116
shoes custom-made for people with allergies, Oct, p 56
shoes for runners with pes planus, Aug, p 48
shoes for running—tips on selection, Mar, p 154
ski binding biomechanics and maintenance, Feb, p 48
ski boot orthoses (downhill), Jan, p 61
treadmills and bicycle ergometers in exercise testing and rehabilitation, Aug, p 75
weight training: free weights vs machines, Nov, p 197
Ergogenics: see also Drugs
mouth appliances cause no increases in strength or endurance after double-blind experiment, Feb, p 101
vitamin B_{15} studies reviewed, Jan, p 107
Ergometers
bicycle ergometers vs treadmills in exercise testing and rehabilitation, Aug, p 75
Examinations: see Preparticipation physical examinations
Exercise: see also Exercise prescription, Flexibility, Testing procedures, Training
can exercise worsen heart disease? five case reports, May, p 69
cardiovascular complications of recreational physical activity, Jun, p 89
dialysis patients helped by exercise program, Sep, p 29
endorphins increase after exercise but little is known about their function, Feb, p 111
guidelines for patients with CHD risk factors appear contradictory, Jun, p 23
